

COASTAL DISPLAY HOME

Bunbury
Western Australia

LD Total designed and constructed this waterwise garden to compliment the interior décor which took on a Coastal theme.

A transplant Dragon tree provides a feature to the front yard, which is surrounded by green kangaroo paws, carex grasses and stunning Boyup Brook riverstone with pontoon timber steppers.

With an aim to reduce the typical turf areas of a normal block, a large split level deck area was created and riverstone pebbles were used to construct a gabion seating wall.

Large planter bowls were placed on rustic timbers which were planted with Papyrus grass, in order to create a visual, low maintenance feature to the rear yard.
