

HEAD OFFICE, BUNBURY
 Mason Street
 Bunbury, Western Australia

DESIGNED BY - LD Total

LD Total South West Head Office was completed in early 2008, and is a testimony to both our in house design and construct ability. Both the building and surrounds were custom designed to service our South West requirements, including modern office buildings, large shed with storage with full workshop and staff facilities, along with a fully irrigated nursery.

The internal office facility, whilst incorporating both ducted reverse cycle air conditioning and underfloor heating, also provides a number of louvered windows and feature sliding doors to ensure breeze flows through the building, providing an optional energy saving cooling system. The exterior features local riverstone gabion walls, rendered feature walls, stone cladding, corten steel edging and columns, granite paving, and jarrah screening.

The waterwise garden, including synthetic turf, simple native plantings compliment the contemporary feel of the premises, and provide a low maintenance, yet stunning landscape.
