# HERON PARK

Nicholson Road  
Canning Vale, Western Australia

DESIGNED BY - EPCAD

This Water Wise Estate has natural features which, together with an innovative design, have made Heron Park the centrepiece of this newly created suburb.

The natural watercourse running through the Estate enables the Public Open Spaces to be irrigated for most of the year without drawing from any bore water, and the retention of existing Melaleucas, gives a majestic presence without requiring water for establishment.

In order to achieve the Landscape Architect's design vision, our construction crews meticulously assembled many unique features including pre-cast lake viewing nodes & bridges, granite/timber seats & shelters, together with limestone walls to the Bio-Retention basins.
